

Junais Babu

Frontend Developer

+91 9385403668 | junaisdvs@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Versatile Frontend Developer with 2+ years of professional experience in designing and developing scalable, responsive applications. Skilled in creating reusable components with React and Next.js to enhance development efficiency and improve user experience.

SKILLS

- **Languages:** JavaScript, TypeScript, HTML, CSS, Java
- **Frameworks & Libraries:** Next.js, React.js, Redux, Tailwind CSS, Sass, Material UI (MUI), Framer Motion, Node.js, Express.js
- **Tools & Platforms:** Git, GitHub, Webpack, Jest, Cypress, AWS, Vercel, MongoDB, Firebase, Figma
- **Concepts:** REST APIs, GraphQL APIs, Clean Architecture, MVC Architecture, SOLID Principles

WORK EXPERIENCE

Frontend Developer | Nona Lifestyle

August 2022 - Present

- Collaborated closely with the product team to exchange ideas on UI design and understand application requirements, while reviewing code to maintain quality and provide constructive feedback to team members.
- Translated Figma designs into responsive React components, implementing them using TypeScript for improved type safety.
- Designed and developed dynamic, responsive websites utilizing HTML, CSS, JavaScript, Next.js, React.js, and Tailwind CSS.
- Utilized REST APIs to fetch and display data from databases, conducting troubleshooting and debugging of application code.
- Established and enhanced front-end architecture for optimal user interface performance, documenting application changes and contributing to ongoing updates.

INTERNSHIP

Full Stack Web Developer | Newton School

December 2021 - August 2022

- Engaged in Full Stack Web Development, focusing on problem-solving while acquiring proficiency in a comprehensive tech stack, including HTML, CSS, JavaScript, React, Redux, Bootstrap, Node.js, Express.js, MongoDB, PostgreSQL, Firebase, and Java.
- Actively participated in contests organized by the platform to enhance problem-solving skills. Successfully completed over 62% of assignments, encompassing Data Structures and Algorithms (DSA) as well as web development.
- Independently developed projects including [Flappy Bird game](#), [social media site](#), [trekking website](#), [Netflix](#) and [OLX](#) clones.

React Developer | Brototype

August 2021 - November 2021

- Developed web applications with a focus on front-end technologies (HTML, CSS, JavaScript, React), prioritizing UI/UX design for a seamless user experience, and enhanced hosting skills by learning website deployment techniques.
- Actively pursued learning C and Java to improve problem-solving abilities.
- Improved communication skills and teamwork through collaborative project efforts.
- Collaborated with a team of 5 to create a responsive website for a Brototype competition, winning first prize.

PROJECTS

Social Media Platform | [Live](#) | [GitHub](#)

- Built a full-featured social media app using Next.js, Tailwind CSS, Shadcn UI, and Firebase.
- Implemented user authentication via Firebase Google Auth, enabling seamless login and secure profile management.
- Enabled complete CRUD operations on posts, including creating, editing, deleting, saving/unsaving, and liking/disliking posts. Integrated post sharing via custom links.
- Added a "Story" feature, where users can post content that automatically deletes after 24 hours.
- Developed a friend system allowing users to send, receive, and accept friend requests, with the ability to unfollow at any time.
- Created and optimized pages for home, people, saved posts, and user profiles to improve navigation and user experience.

Ecommerce Management System | [Live](#) | [GitHub](#)

- Developed a comprehensive CMS, Admin, and API to manage multiple vendors/stores, generating individual API routes for each (e.g., Shoe store, Laptop store), including an [Admin Dashboard](#).
- Implemented CRUD functionality for categories, products, filters (e.g., color, size), and billboards, including the ability to upload and manage multiple product images.
- Enabled search and pagination across categories, products, sizes, and billboards; featured product control for homepage display.
- Integrated order management, sales tracking, and revenue graphs, with Clerk authentication, Stripe checkout, and webhooks.
- Utilized technologies Next.js, MySQL, Prisma, and PlanetScale for database management.

EDUCATION

Bharathiar University

Bachelor of Commerce (BCom)

June 2018 - May 2021

Gudalur, Tamil Nadu, India
